Activity 1: Who's at Risk?

- ☒ 1. Jessica has a cut on her finger that looks infected. She covers it with a bandage and then starts prepping salads.
- ☒ 2. Lee didn't have time to do laundry. He is wearing the same chef coat he wore yesterday.
- ☒ 3. Tegan is wearing her diamond wedding ring and medical bracelet while making pizza.
- ☒ 4. Jorge has a pimple on his chin. He doesn't even realize how often he touches and picks at it while he is making sandwiches.
- ☐ 5. Sarah has just finished using the restroom. After washing her hands correctly, she puts on a new pair of single-use gloves before going back to work in the prep area.
- ☒ 6. Rita is a pizza maker. She felt fine when she got to work, but a few hours later started to get a sore throat and fever. She decided not to tell her manager because she needed the money from this shift.
- ☒ 7. Gary, a dishwasher, has allergies. Sometimes he needs to spit, so he spits in the garbage can next to the sink.
- ☒ 8. Noreen has just finished cutting raw meat for a stew. She is in a hurry and needs to chop vegetables for a salad, so she takes off her single-use gloves and replaces them with a new pair without washing her hands in between.
- ☒ 9. Tim, a pastry chef, has dandruff, which itches. He tries not to scratch his head, but sometimes he just has to do it.
- ☒ 10. Alison just got her hair cut and it won't all fit up into a ponytail. She has used bobby pins to pin her hair up on the sides before going into work as a chef.

Activity 2: Which Action Can Spread Pathogens to Food?

Wearing jewelry on hands and wrist, and having long fingernails

Cutting melon with bare hands

Smoking while prepping food

Ear rubbing
